- **React**
- **Tailwind CSS**
- **Node.js**

#### **Project Management Tools:**

- **Jira**

#### **Version Control and Collaboration Tools:**

- **Git**
- **GitHub**

## **Projects**

---

### **Opal- Foodcart — <https://github.com/Opal-Organic-Market/Opal-Foodcart.git>**

In the project, we developed the front-end of a marketplace application. Key accomplishments include:

1. Item Management: Enabled sellers to manage their listings.
2. Catalog Viewing: Allowed buyers to view, search, and filter items.
3. Shopping Cart: Implemented a feature for buyers to add items to their cart.
4. Checkout System: Developed a system for buyers to check out items.

### **Honey Selling Company Landing Page**

- Developed a landing page for a honey selling company using HTML, CSS and Bootstrap.
- Added a contact form, a testimonial section and a footer with social media links.

### **React To-Do App**

- Created a to-do app using React and JavaScript.
- Used React hooks to manage the state and functionality of the app.
- Added features such as adding, and deleting

### **Homecare Services App (in progress)**

- Collaborated with a startup to help them with the ideation stage of an app to help manage their homecare services clients and workers.

- Conducted user research and created user personas, user stories and user flows.

## Awards and Achievements

---

1. **Opal- Foodcart** — <https://github.com/Opal-Organic-Market/Opal-Foodcart.git>  
was selected as the first runner up in a competition.
